DETAILED ACTION

1. This office action is in response to the Application filed 11/28/2000 and amendment filed 02/15/2005.
2. Claims 1-11 are pending in the Application.
3. Applicant's amendment has been fully considered. Examiner finds them persuasive.

Allowable Subject Matter

4. Claims 1-11 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach the comparison of the circuit elements stored in the available area and corresponding circuit elements stored in the unavailable area (for storing a plurality of previously stored circuit patterns) and indicating an **agreement** between the compared circuit elements of the ladder circuit editing system as claimed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sano et al. (EP 551098 A1) discloses a displaying method in a programming system, wherein a sequence program is displayed as a ladder circuit, and a temporary storage memory (b) generated for storing the selected portion of the ladder

circuit and compared with the multiplicity of ladder circuits previously stored in the program memory (a) to display a representation of the reference ladder circuit from the memory (b), which is distinguished from the other ladder circuits stored in the program memory (b), but lacks indicating an **agreement** between the compared circuit elements of the ladder circuit editing system.
